Geo Map Overlay

Help Information

Geo Map Overlay

The Geo Map Overlay is a graphical representation of the volume of visitors coming from locations around the world. The largest points indicate locations driving the most visitors to your website. Click on any point to see the number of visits, pageviews per visit, conversion rates, and the average visit value for that region. Change the number of data points by increasing the number displayed in the Display pulldown on the title bar. Zoom in on any region by right-clicking and selecting "zoom in" in the Display menu.
